Projects

India Census 2011 – EDA & Clustering| *Python, Streamlit, scikit-learn, plotly* **September2025– November2025**

- Conducted detailed EDA on 20,000+ census records covering 36 states and 640+ districts for demographic insights.
- Engineered 10+ key features including literacy rates, sex ratio, workforce participation, and social group distributions.
- Applied K-Means clustering (K=2) with PCA and silhouette analysis to identify actionable clusters across all regions.
- Developed interactive Streamlit dashboard for real-time visualization; modular Python pipeline ensured <2 seconds data load.

  GitHub Link: **https://github.com/Jayasriramsankarasetty/EDA-Project**

Legal Document Analyzer | *Python, scikit-learn, spaCy, Streamlit, pandas, Matplotlib* **June 2025–July 2025**

- Built NLP & ML pipeline to classify 40+ legal clause categories with EDA visualizations using CUAD dataset effectively.
- Improved Linear SVC accuracy from 74.2% to 76.8% using 10 tuning experiments and validation techniques strong.
- Extracted 3+ entity types including dates and amounts using spaCy NER with 90%+ precision reliably successfully.
- Deployed Streamlit app supporting 100+ contract uploads with <2s prediction latency performance live usage.

Training

Lovely Professional University(Centre for Professional Enhancement) **June 2025–July 2025**

Machine Learning Made Easy: From Basics to AI Applications

- Mastered 20+ machine learning concepts across supervised and unsupervised algorithms building practical foundations skills.
- Applied preprocessing and feature engineering techniques on 5+ datasets for real world projects and practical insights.
- Implemented 10+ models including regression classification clustering and ensemble methods using scikit-learn Library.
- Learned model evaluation using 10+ metrics and hyperparameter tuning for reliable validation across diverse scenarios
- Gained merit recognition after completing 3+ projects demonstrating strong problem solving abilities in real environments.

Certificates

- **Deep Learning with TensorFlow and Keras** – *Udemy (Certificate-Link)* **February2026**
- **Python for Data Science and Machine Learning** – *Udemy (Certificate-Link)* **January 2026**
- **Cloud Computing** – *NPTEL (Certificate-Link)* **November 2025**
- **Machine Learning** – *Centre of Professional Enhancement* (Certificate-Link) **October 2025**
- **SQL(Basic)** – *Hacker Rank (Certificate-Link)* **May 2025**

Technical Skills

- **Languages:** Java, Python, C, SQL
- **Frameworks:** NumPy, Pandas, Scikit-learn, PyTorch, TensorFlow
- **Tools:** Version Control (Git, GitHub), Jupyter Notebook, Google Colab, Tableau
- **Skills:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Networking, DBMS, RESTful APIs, Modular Code Design

Education

Lovely Professional University **2023 – Present**

B.Tech in Computer Science and Engineering *Jalandhar, Punjab*

Vidwan Junior College **2022 – 2023**

12th with Science – Percentage: 87% *Guntur, Andhra Pradesh*

Bhavya Cements DAV School **2020 – 2021**

10th with Science – Percentage: 74% *Guntur, Andhra Pradesh*
