Github: https://github.com/Jayasriramsankarasetty/ Mobile: +91-7842224610

Skills

- **Languages**: Java, Python, C, SQL
- **Frameworks**: NumPy, Pandas, Matplotlib, Seaborn, PyTorch, TensorFlow, NLTK, spaCy
- **Tools/Platforms**: Tableau, Jupyter Notebook, Google Colab, Version Control(Git, Github)
- **Soft Skills**: Collaborative, Agile and Resilient, Problem solving, Adaptability, Project management, Self-Learning

Projects

Legal Document Analyzer | *Python, scikit-learn, spaCy, Streamlit, pandas, Matplotlib* Jul'25

- Built NLP classifier for 40+ legal clauses using CUAD dataset and Python ML tools for smart document insights.
- Improved Linear SVC accuracy from 74.2% to 76.8% through tuning and performance testing across clause models.
- Extracted dates organizations and monetary entities using spaCy NER for structured legal document understanding tasks.
- Deployed Streamlit app enabling contract upload real time clause prediction and dynamic visualization dashboards.

Nestlé Stock Price Prediction | *Pandas, Numpy, Matplotlib, scikit-learn* Jun'25

- Processed 1200+ stock records from five years of trading data for accurate financial forecasting and trend modeling.
- Performed EDA creating 15+ visual charts to identify trends correlations and strong trading behavior patterns clearly.
- Achieved R2 score of 0.9998 and MAE 34.35 using regression and random forest models for price prediction tasks.
- Visualized actual versus predicted prices reducing forecasting errors by 18% through tuning and evaluation methods.

Web3 Trader Sentiment Analysis | *Pandas, NumPy, Matplotlib, Seaborn, Google Colab* Dec'24

- Analyzed 10000+ trade records using 365+ sentiment index values to study emotional market behavior patterns deeply.
- Cleaned and normalized 15+ dataset features improving overall data quality by 30%+ improvement success rate.
- Engineered 5+ trading metrics including volume trends and profitability signals across 4 sentiment market phases.
- Created visualizations and insights for developing advanced sentiment-based risk management strategies frameworks.

Training

Centre for Professional Enhancement(Lovely Professional University)
Machine Learning Made Easy: From Basics to AI Applications Jun'24 –Jul'24

- Mastered 15+ machine learning foundations including 10+ supervised and 5+ unsupervised algorithms confidently effectively.
- Performed hands-on work on 5+ datasets applying 20+ preprocessing and feature engineering techniques successfully.
- Implemented 10+ regression classification clustering and ensemble models using 1 primary scikit-learn library effectively.
- Learned 10+ evaluation metrics with 5+ validation strategies and hyperparameter tuning methods for robust systems.
- Completed 3+ practical projects demonstrating strong problem-solving skills and earned 1 merit based recognition award.

Certificates

- DSA with java – *ApnaCollege* Nov'25
- Machine Learning Made Easy: From Basics to AI Applications – *CPE(LPU)* Aug'25
- Python Programming – *iHUB DivyaSampark: IIT Roorkee* Jul'24
- C Language – *Neo Colab* May'24
- Responsive Web Design – *freeCodeCamp* Apr'24

Achievements

- **Outstanding Grade in ML Training** Jun'25–Jul'25
  Achieved outstanding performance (O Grade) in *Machine Learning* training conducted by Centre for Professional Enhancement (Lovely Professional University).
- **Leadership & Extra Curricular** May'24–Jul'24
  Volunteered at an NGO supporting senior citizens, actively contributing to meaningful community welfare initiatives.

Education

Lovely Professional University Jalandhar, PB
Bachelor of Technology - Computer Science and Engineering *Aug'23-Present*

Vidwan Junior College Guntur, AP
Intermediate; Percentage: 87% *June'22 – Mar'23*

Bhavya Cements DAV Public School Guntur, AP
Matriculation; Percentage: 74% *June'20 – Mar'21*
